

■ Resources on Health and Environment Philanthropy

Health and Equity: Finding Solutions Upstream, an essay authored by Marni Rosen and Kathy Sessions for the Grantmakers In Health 2012 annual meeting.

www.gih.org

Philanthropy at the Intersection of Health and the Environment, authored by Karla Fortunato and Kathryn Sessions in the peer-reviewed health policy journal *Health Affairs*, May 2011.

www.healthaffairs.org

Philanthropy and Disparities: Progress, Challenges, and Unfinished Business, authored by Faith Mitchell and Kathryn Sessions in *Health Affairs*, October 2011.

www.healthaffairs.org

Giving InSight, a weekly blog for and about funders focused on health and the environment.

www.blog.hefn.org

Health and Environmental Funders Network (HEFN) provides grantmakers investing at the intersection of health and the environment with information and opportunities to learn, network and collaborate.

www.hefn.org

■ Resources on Health and the Environment Issues

Environmental Health Topics from the National Institute of Environmental Health Sciences provides information on conditions and diseases linked to environmental exposures, environmental agents that may cause adverse health effects, and environmental science basics.

www.niehs.nih.gov/health/topics

Environmental Health News provides a searchable archive of news stories, scientific publications and other reports on environmental health issues from media outlets around the world.

www.environmentalhealthnews.org

The Collaborative on Health and the Environment offers events and resources for researchers, health professionals, and health-affected groups about social and environmental impacts on health.

www.healthandenvironment.org

Healthy People 2020 is the official US ten-year agenda of science-based objectives for improving the health of all Americans, including six themes “to promote health for all through a healthy environment.”

www.healthypeople.gov

■ Resources on Community Environmental and Health Conditions

National Environmental Public Health Tracking Network integrates health, exposure and hazard information. This Centers for Disease Control and Prevention site provides national information as well as links to 24 state or municipal tracking networks.

www.ephtracking.cdc.gov

The US Environmental Protection Agency offers a “MyEnvironment” mapping tool of information about environmental conditions in US locations, as well as other resources for community action on environmental public health issues.

www.epa.gov/epahome/community

Scorecard offers searches by zip code of local pollution information and environmental quality, a project of the Good Guide integrating data from over 400 scientific and government databases.

www.scorecard.goodguide.com

County Health Rankings & Roadmaps provides county-level maps and information about community conditions that affect health, through a collaboration of the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute.

www.countyhealthrankings.org

■ Tools for Community Assessment

Health Impact Project offers resources about using health impact assessments (HIAs) to identify and address potential health impacts of an upcoming decision. This national initiative is a collaboration of the Robert Wood Johnson Foundation and the Pew Charitable Trusts.

www.healthimpactproject.org

Cumulative Impacts Screening Method is a tool for mapping social, health, environmental and land use information to help identify communities at risk and inform planning. The CI method is a joint effort by researchers at Occidental College, University of California-Berkeley and the University of Southern California.

www.dornsife.usc.edu/pere/projects/cumulative_impacts

Several resources for tax-exempt hospitals and health care organizations interested in environmental health community benefit work are available on the Catholic Health Association website.
